

Seeing is believing

CGI [forensics / accidents reconstruction]

FOR LEGAL INDUSTRY

MODELLING THE REAL WORLD
DECEMBER / JANUARY

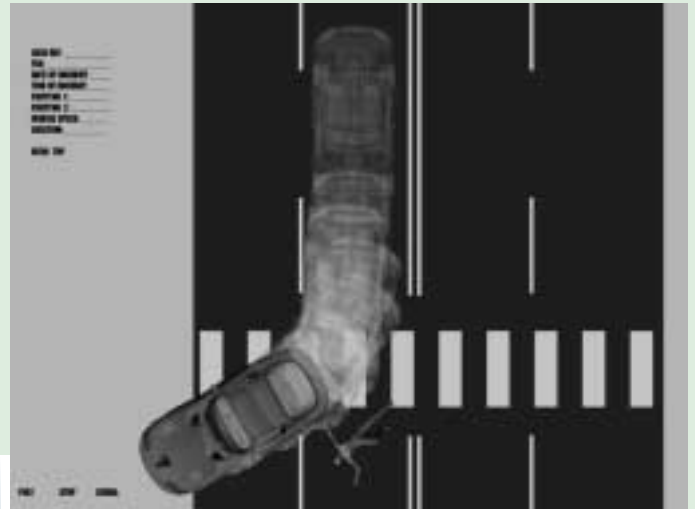

Computer Graphics today is so all pervasive and we are in the business of accidents reconstruction and forensics animation.

EXACO (Singapore) Animations play a key role in factual dramatizing of scenes for ships/vessels accidents, vehicular road accidents, personal injury, product liability, faulty construction and project execution gone terribly wrong.

Visual representation and accurate simulation of forensics event can assist in pretrial settlement discussions and has proven useful in numerous negotiations in and out of courts.

When you built your case with exhibits and needed multimedia in the courtroom(s), or when events need be communicated across the continents via partners' offices.. etc, you can benefit from EXACO's team of Engineers and Studio professionals for accurate, factual, unbiased events reconstruction via studio animations.

We know the value of listening first, getting the relevant details to fully understand the motions that occurred. Only then do we respond with the right views and reconstruct the event with time-based animation.

NB: Admissibility in Court.
Animation tells the story to accurately portray facts provided to us via site measurements and eyewitness testimony, EXACO shall have neither liability nor responsibility on court admissibility of graphics animation in support of case.

ISO 9002 Certified by ABS Quality Inc.
Member of SIGGRAPH.
Licensed Appraiser / Vessels valuation.
Approved by ABS, NKK, Lloyd's, BV, GL, RINA and DNV Classification Societies.
Animation Awarded GOLD AWARD in 1999 ASMI Safety Improvement Team Convention.

Committed  to Quality
